

USE CASE
BIOTrust

BUSINESS PROBLEM:

Ghost workers are defined as persons on an organisation’s payroll that does not perform actual work. They reduce the resources available to the organisation and negatively impact the organisation’s credibility.

LAWtrust’s customer, a local municipality required an audit of their payroll to establish if they had any ghost workers.

LAWTRUSTS SOLUTION

To sanitise the payroll, LAWtrust deployed the BIOTrust biometric solution. The solution requires each employee to sign the receipt of their pay check with their fingerprint.

The results were immediate. During the first month the BIOTrust solution discovered 3000 ghost workers.

BENEFITS TO PUBLIC SECTOR

| ROI | COST SAVINGS | REPUTATION |
|---|--|---|
| Eliminating ghost workers from the payroll yielded a return on investment over time, based on the savings derived from the reduced payroll. | Reducing the payroll ensured that the municipality had more resources at their disposal. | The organisation was able to restore public confidence by curbing corruption. |
